

Capstone Project: Task 1 Solution

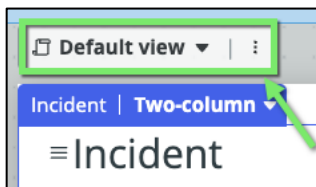

Update Incident Management

Instructions: Modify the Incident form so that it can support a new process for troubleshooting technical issues reported by Strawberry sFone users. To enable this, you will need to create a new field, configure the default view of the Incident form, and add a new choice (sFone) to the Category field.

Note: Refer to Module 3: Configure Applications for Business

A. Create a New Form Field

1. Create a new field and add it to the Default view of the Incident form.
2. Navigate to **All > Incident > Create New**.
3. Select the **Additional Options Menu**, then select **Configure > Form Builder**.
4. Ensure Default view is selected in the View name choice field under the Form view and section.

5. Select **+Add a field in the table** section, populate the properties as follows:
 - Name: **sFone Model**
 - Type: **String**
6. Select **Add**.

7. Select **Done**.
8. Move the **sFone Model** field up under **Configuration item** in the **Selected** column.

9. Select **Save**.
10. **Close the Form Builder** and return to the previous tab in the Platform.

B. Add a Choice Field Option

Add a new choice value to the **Category** field.

1. From the Incident record, right-click on the **Category** field label.
2. Select **Configure Choices**.

3. Type **sFone** into the **Enter new item** field.

4. Select **Add**.
5. Select **Save** to return to the incident record. Confirm the **sFone** choice appears last on the list for the **Category** field.

C. Create a Non-P1 sFone Incident

Create a Non-P1 sFone Incident to put your form changes into action.

1. Navigate to **All > Incident > Create New**.
2. Populate the form with the following properties:
 - Caller: **Megan Burke**
 - Category: **sFone**
 - Short Description: **My sFone will not turn on.**
3. Select **Submit**.

TASK VERIFICATION

1. Verify that the new sFone category choice and sFone Model field appear on the Default View of the Incident form.
